**DEMAND DEMERS.**

▣ ▣ I can trust a Demers Type I to get me to a call quickly and safely. Demers really pays attention to details like paramedic comfort and ergonomics, which makes for better working conditions. And ultimately, that helps me save lives. ▣ ▣

# TYPE I - ENGINEERED FOR EXTREME CONDITIONS

## MXP 150 & 170

Demers' Type I MXP ambulances are built to handle extreme conditions, from desert heat to icy mountain roads to urban jungles. Configured for a 4x4 or 4x2 chassis, the MXP 150 and 170 combine a rugged exterior with top-of-the-line design details, like all-around LEDs, Multiplex system and aluminum cabinetry. Demers' MXP ambulances come equipped with more standard features than any other comparable Type I on the market—so why pay more for custom upcharges?

# ECOSMART

## ECONOMICALLY AND ECOLOGICALLY SMART

Demers has developed a program to help EMS services reduce their costs, fuel consumption and impact on the environment. ECOSmart technologies are in line with our sustainability objectives and deliver on our customers' expectations to save lives—and save on costs.

---

### AERODYNAMIC ROOF DESIGN UP TO 8% SAVINGS IN FUEL COSTS

The head-turning aerodynamic lines of a Demers ambulance aren't just cool to look at—they can save up to a cool 8% in fuel costs, depending on the ambulance type and model. And every Demers ambulance is standard equipped with the signature aerodynamic roof design with incorporated LED warning lights for enhanced safety and durability.

---

### LIGHTWEIGHT MATERIALS FOR BETTER FUEL ECONOMY & HIGHER RESALE VALUE

Demers Ambulances' engineering team focuses constantly on efficiency to make our designs as light and as durable as possible, so EMS can carry more equipment safely, while still lowering fuel consumption. After its service life, the better-looking, more equipped Demers ambulance also gets more on the resale market. Every detail counts when it comes to improving EMS Specialists' work and driving more money to your bottom line.

---

### ANTI-IDLING SYSTEM UP TO 40% REDUCTION IN FUEL CONSUMPTION

Another Demers innovation! The ECOSmart Anti-Idling System provides automatic fuel savings. Powered by the DEMS (Demers Electrical Management System), the Demers ECOSmart system creates an intelligent, super-efficient anti-idling engine—an innovation that delivers automatic fuel savings of \$1,500-\$2,000 a year, or a reduction in fuel consumption of over 40%. That means a reduction of almost 4.5 tonnes of CO<sub>2</sub> emissions per vehicle, per year.

# THE DEMERS DIFFERENCE

For 50 years running, we've been driven by the philosophy that every single detail counts towards making a superior vehicle. Our continual engineering enhancements, improvements and innovations make Demers' ambulances some of the safest on the road. Building on detail after detail, our ambulances have also achieved the best dollar-for-dollar value: ingenious design, ergonomics and our award-winning ECOSmart system contribute to the lowest total cost of ownership in the industry. Demers' details make outstanding ambulances that consistently exceed expectations. Ambulances engineered to keep your people safe—so they can keep on saving lives.
