MX 164

Demers' MX 164 ambulances are our work-horse and overall best-selling Type III ambulance. With hundreds of units in service around the world, this design offers best-in-class safety, ergonomics and reduced maintenance. While they do come feature rich from the get-go, they also offer **multiple optional layouts** to provide you with even more choices. Offering our industry-leading mobility track seat as an option on the MX 164, it truly is one of a kind.

MX 170

The MX 170 is our state-of-the-art, full-size Type III ambulance, offering a roomy interior for extensive medical equipment and an **optimal ergonomic work environment** for EMS specialists. Tested to global standards, this ambulance is built with unique features such as full-length, all-aluminum extruded door construction for maximum storage access without compromising structural integrity. Offered with our industry-leading mobility track seat as an option, the MX 170 is the leader in its category.

ECOSMART

ECONOMICALLY AND ECOLOGICALLY SMART

Demers has developed a program to help EMS services reduce their costs, fuel consumption and impact on the environment. ECOSmart technologies are in line with our sustainability objectives and deliver on our customers' expectations to save lives—and save on costs.

AERODYNAMIC ROOF DESIGN UP TO 8% SAVINGS IN FUEL COSTS

The head-turning aerodynamic lines of a Demers ambulance aren't just cool to look at—they can save up to a cool 8% in fuel costs, depending on the ambulance type and model. And every Demers ambulance is standard equipped with the signature aerodynamic roof design with incorporated LED warning lights for enhanced safety and durability.

LIGHTWEIGHT MATERIALS FOR BETTER FUEL ECONOMY & HIGHER RESALE VALUE

Demers Ambulances' engineering team focuses constantly on efficiency to make our designs as light and as durable as possible, so EMS can carry more equipment safely, while still lowering fuel consumption. After its service life, the better-looking, more equipped Demers ambulance also gets more on the resale market. Every detail counts when it comes to improving EMS Specialists' work and driving more money to your bottom line.

ANTI-IDLING SYSTEM UP TO 40% REDUCTION IN FUEL CONSUMPTION

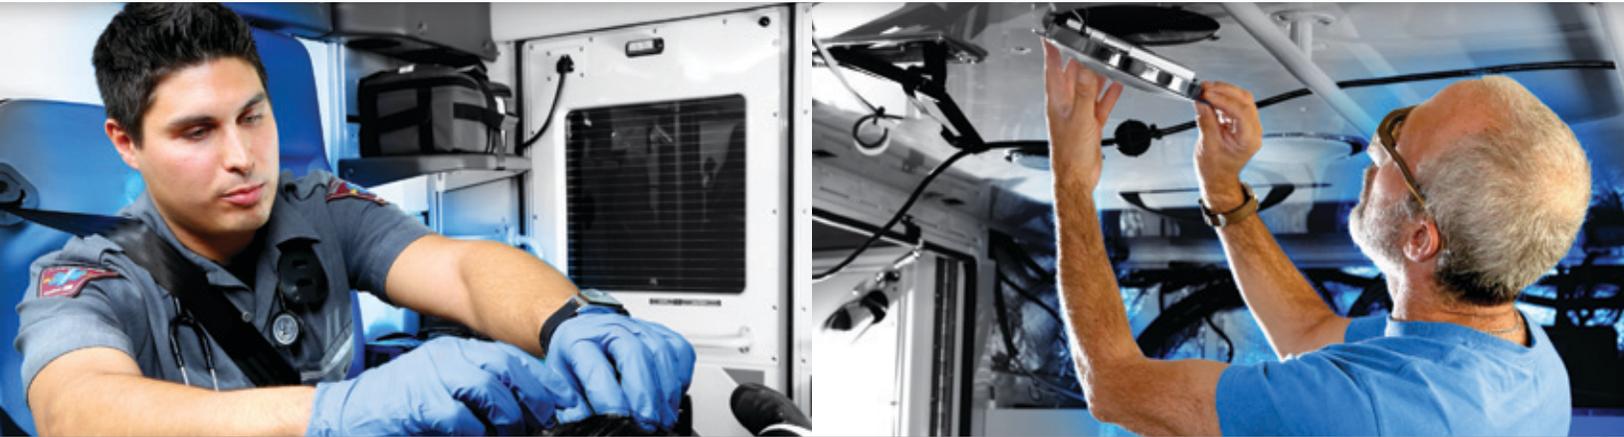

Another Demers innovation! The ECOSmart Anti-Idling System provides automatic fuel savings. Powered by the DEMS (Demers Electrical Management System), the Demers ECOSmart system creates an intelligent, super-efficient anti-idling engine—an innovation that delivers automatic fuel savings of \$1,500-\$2,000 a year, or a reduction in fuel consumption of over 40%. That means a reduction of almost 4.5 tonnes of CO₂ emissions per vehicle, per year.

THE DEMERS DIFFERENCE

For 50 years running, we've been driven by the philosophy that every single detail counts towards making a superior vehicle. Our continual engineering enhancements, improvements and innovations make Demers' ambulances some of the safest on the road. Building on detail after detail, our ambulances have also achieved the best dollar-for-dollar value: ingenious design, ergonomics and our award-winning ECOSmart system contribute to the lowest total cost of ownership in the industry. Demers' details make outstanding ambulances that consistently exceed expectations. Ambulances engineered to keep your people safe—so they can keep on saving lives.
